SHANGHAI THENOW PURIFICATION TECHNOLOGY.CO.,LTD

NO.59, Linsheng Rd., Tinglin Town,
Jinshan District, Shanghai, China

Stock code: 834706

Tel: +86-21-59177719 Email: info@thenow.cn

Children Focus On Study
Thenow Focus **On Health**

— Special Design for School —

Guarding The Children' s Health
Bringing Clean Fresh Air

Pure ESP System

— Multi-layer High Efficiency Purification —

① Pre Filter

Washable Pre-filter can prevent large particles such as the dust, soft flocks etc., in the air efficiently.

② Electrostatic Precipitator

High efficiently kill the bacterial virus in the passing air, filter smaller particles (lower to 0.001 micron), maintaining by washing rather than replacing.

③ Catalytic Plate Filter

Discomposes the Ozone derived from the high voltage static and other TVOC etc., no need to change.

④ H13 HEPA Filter

Removing PM2.5 and other smaller particles, self-production with stable quality and low maintenance cost.

Unique Craftsmanship, Hidden Ingenuity

- Minimalism style, easy to match.
- Baking varnish surface, glossy and antioxidant.
- Safe rounded edge design.

Pursue Perfection of Details, Quality Products Show Naturally

- Ductless type supplies air with **45°** air outlet tenderly and quietly. Ducted type distributes fresh air into different rooms.
- Duct connections available on three sides to suit different applications.
- Easy access to wash and replace the filters.
- Cabinet door with CAM LOCK, Much safer.

/// Our full heat exchange core with imported nano fiber membrane, recovery rate up to **75%**.

In Winter—AC Warming

- Heat Exchange Calculation Formula
In Winter: Supply Air Temperature=(Indoor Temperature-Outdoor Temperature) X Enthalpy Recovery Efficiency + Outdoor Temperature

In Summer—AC Cooling

- Heat Exchange Calculation Formula
In Summer: Supply Air Temperature=Outdoor Temperature-(Outdoor Temperature-Indoor Temperature) X Enthalpy Recovery Efficiency

Functional Structure With Real Stuff

- Metal sandwich sheets structure, lined with another layer of insulation material which is environmental-friendly, much stronger, lower noise and more insulated.

EC Motor

- EC motor, more than **60%** energy saving compared to traditional AC motor, and more stable and environmental-friendly, lower noise and larger air volume.

EPS Air Channel

- EPS air channel and noise insulation structure designed with CFD, low pressure drop and noise under big airflow, as well as tender air supplying and comfortable feeling.

Intelligent Controller

- Full LCD touch screen, easier operating. Real-time display of the indoor and outdoor temperature, humidity, CO₂, PM2.5, and TVOC.
- With CO₂ and PM2.5 sensors, automatically adjust fresh air volume to provide ample oxygen and keep clean.
- Filter indicator available and fault code display.

PTC Preheater, Enjoy Warm Air In Winter

- When the intake air temperature is too low, the preheater can prevent the whole heat exchange core from condensing and freezing, and warm the fresh air at the same time.
